

February 2019 Monthly Parish Report Samford Division

Green light to develop more specialist education placements in Suffolk

On 29 January 2019, Suffolk County Council's Cabinet agreed recommendations to move forward with creating more specialist education places in Suffolk.

Suffolk will need between 300 to 400 places for children with additional needs between now and 2020, and this figure is likely to continue to increase. The demand for specialist education places in Suffolk is rising rapidly due to the county's population growth, advances in medicine, and the increasing complexity of specialist needs.

The recommendations include three new special schools and 36 specialist units attached to existing mainstream schools, which combined will create over 800 new specialist education places in the county. The Cabinet also agreed that a clarified education pathway for specialist provision is created to assist families in understanding what the local offer is.

Following the approval of the recommendations, the proposal to borrow up to £45.1 million to fund the new places will now go to the county council's Capital Strategy Group to be reviewed. If agreed, the decision will go back to Cabinet in the Spring for final sign-off so the recommendations can be rolled out.

As reported in the media I said:

"I welcome today's decision. Suffolk County Council is committed to ensuring all of Suffolk's children and young people are able to attend a good local school, one that meets their individual needs and supports them to achieve their full potential regardless of the challenges they may face."

"The decision today will help to create hundreds of more specialist school places across the county, reducing our dependence on placements outside of Suffolk, which come at a high cost, and transforming the experience of education for our children and young people with SEND."

Suffolk's roads warming to £300,000 thermal patching technology

Suffolk Highways is celebrating road repair success following a £300,000 investment in Nu-phalt Thermal Patching technology.

The investment, which has been funded from the extra £9.67 million received from central government in the autumn, has aided the county's Highways teams to carry out more effective, longer-lasting repairs to Suffolk's road surface.

Over the last month, Suffolk Highways has deployed three thermal road repair machines which have repaired approximately 1,700 potholes county-wide.

The process includes an eight-minute heating cycle of the road surrounding the defect allowing for the existing road surface to be heated to 200 Celsius. The surface is then raked, topped up with bitumen binder and pre-heated material, then compacted. This all takes place within the service's much-favoured 15-minute temporary closure.

The process does not require excavation of the highway, meaning no dust or noise, and better still, no waste material. The result also means there are no surface joints, which can be prone to faster deterioration.

Following its success, Suffolk Highways is now looking to accommodate this technology by adapting some of its own fleet to self-deliver this repair technique from March.

Beyond the investment in Nu-phalt Thermal Patching technology, the £9.67m of funding will enable a programme of work. This includes improvements and repairs to the pavements in the town centres of Stowmarket, Felixstowe and Haverhill and drainage work to solve long-term flooding problems on the A12 – Wangford bypass, the A143 – Bury St Edmunds Compiegne Way, and the A1120 – Cedars Link Stowmarket.

On rural roads, when preparing roads for next summer's surface dressing, the funding will allow for work to clear drains and gullies, cut back hedges, cut grips and clean signs.

Department for Education recognises outstanding performance by Suffolk students

On 24 January 2019, the Department for Education published revised GCSE and A Level results.

GCSE

Suffolk has risen in national league tables for students in the county achieving the standard GCSE pass in English and Maths.

Today's validated figures from the Department for Education confirm that 1% more students in Suffolk are achieving the expected standards in English and Maths at GCSE compared with last year.

Since 2015 there has been a change to the way that English and Maths GCSEs are graded. Results are now graded from 9 to 1, (previously A to G) with 9 being the highest and 1 being the lowest.

The expected standard for pupils to achieve is now a grade 4 (a standard pass) and above (previously a C grade and above), with grade 5 considered a 'strong pass'. These changes will be phased in to cover all subjects by 2020.

64% of students in Suffolk are now achieving the expected standard in English and Maths, putting Suffolk in the top half of authorities achieving this standard.

GCSE progress remains above average and Suffolk students have seen a steep increase this year with a Progress 8 score of +0.08, compared with -0.02 nationally. This figure puts Suffolk in the number 1 position in our statistical neighbour group.

Progress 8 measures how well pupils of all abilities have progressed by comparing them with students who achieved similar levels in Key Stage 2 across the country. Suffolk is in the top half of authorities for this figure, ranked 42nd out of 151.

The percentage of disadvantaged pupils in the county achieving the standard pass in English and Maths is in line with national figures. The Progress 8 figure for disadvantaged pupils is also above the national level and is in the top half of authorities, ranked 42nd out of 151 (up from 67th in 2016).

A Level

The validated A Level figures confirm that Suffolk pupils have once again performed well with the number of A*- E grades remaining above the national average figures.

The figures show that 98.1% of A Levels taken in the county have been awarded an A*-E grade, compared to 97.6% nationally. A Level attainment is measured by the Department for Education using a points system. Points are given based on the type of A Level and the grade achieved. For example, an A Level at grade A is worth 50 points, whereas an AS Level would be worth half of this.

Suffolk's A Level average points per entry this year has risen by 0.3 to 30.3 compared with this time last year.

Local councils urge people to take part in Sizewell C consultation

People in east Suffolk are invited to take part in the latest round of consultation about the Sizewell C nuclear power station.

EDF Energy's Stage 3 Public Consultation launched on 4 January 2019 and runs for 12 weeks, ending on 29 March 2019. Suffolk Coastal District Council and Suffolk

County Council have stressed the need for everyone to take an active part in the consultation

This stage of the consultation process seeks views on the development needed to enable construction, and EDF Energy reveal proposals and various options for road and rail improvements in the area that would be affected by the construction of such development

Suffolk Coastal District Council and Suffolk County Council are key members of the Sizewell C Joint Local Authority Group (JLAG), which was established to facilitate a joint local authority approach to the challenges and opportunities that will result from the construction and operation of the proposed new nuclear power station. The councils have pledged to help and support town and parish councils to ensure they have their say during the 12-week public consultation.

On Tuesday 22 January 2019, community leaders from across east Suffolk came together to offer initial observations, discuss views, and raise questions with members of JLAG. Over 100 attendees, representing around 30 town and parish councils attended the event. Many aspects of EDF Energy's consultation proposals were raised during question and answer sessions and round table discussions.

Suffolk Coastal District Councillor Geoff Holdcroft, Chairman of Sizewell C Joint Local Authorities Group (JLAG) said:

“As a Joint Local Authority Group, we are working hard for Suffolk people to put forward local views on how the impact of a new power station must be mitigated should the development go ahead. Both local authorities are doing this by submitting our views as part of this consultation period, however it is also very important that as many people as possible provide their views directly to EDF Energy. I urge all local communities to submit their comments ahead of the Friday 29 March 2019 deadline.”

County Council's commitment to Ipswich reiterated as three bridges project proves unaffordable

On 29 January 2019, Suffolk County Council's Cabinet agreed the recommendations of a report on the Upper Orwell Crossings and reconfirmed its commitment to regenerating Ipswich's Waterfront.

The report, which explains how extensive work to secure additional financial backing for the three bridges project has been unsuccessful, recommended that the existing project be stopped, and that instead the Executive Director for Growth Highways and Infrastructure, in consultation with the Cabinet Member for Ipswich Communities and Waste, work with partners to deliver crossings B and C in the Waterfront area.

Suffolk County Council will continue to underwrite a maximum of £10.8 million, the balance of their previous commitment, and will require other significant local contributions to enable the project to go ahead.

Councillor Matthew Hicks said:

"Suffolk County Council remains fully committed to the future development and continued success of our county town. To reiterate this commitment, we are still prepared to commit financially towards the costs of building the two smaller bridges, providing we can find significant funding partners to work with us and up to a maximum of £10.8 million which respects the overall commitment we made in 2016 towards the local contribution, less the costs incurred to date."

"It is very disappointing that we have been unable to secure any additional funding for the Upper Orwell Crossings and that the existing project will have to stop with immediate effect. We have exhausted all funding opportunities including The Department for Transport, HM Treasury, local businesses and other stakeholders."

10,000 Suffolk homes say 'no' to cold callers on their doorsteps

Suffolk Trading Standards recently gave out its 10,000th No Cold Calling sticker, just four years after launching the campaign.

The stickers are placed on a homeowner's front door to declare that the resident does not want uninvited traders to call at their property.

The Consumer Protection from Unfair Trading Regulations 2008, state that traders who approach a resident after having seen the sticker, are committing an offence.

Further details on No Cold Calling zones and how to get a No Cold Calling sticker can be found at www.suffolk.gov.uk.

Places available for "life changing" Great East Swim programme

The Great East Swim programme is ideal for anyone who would like to become more active and is ready to make that change in their life. There are 96 places available on the 2019 programme, which starts in March and culminates on the 22 June 2019 at the Great East Swim at Alton Water reservoir near Ipswich.

The programme is open to individuals who are aged 18 years and over who are not currently physically active. The programme take place at Crown Pools in Ipswich and Haverhill Leisure Centre, Haverhill, between March and June.

This will be the eighth year that the programme has been run, during which time over 370 individuals looking to make a positive change to their health and wellbeing have completed the challenge of swimming either half a mile or 1 mile in open water at the Great East Swim.

The 2019 programme is delivered in partnership with, Suffolk County Council, Ipswich Borough Council, Abbeycroft Leisure Trust, Suffolk Sport and Allied Health professionals.

Individuals who sign up for the programme will receive an extensive package of support which aims to provide them with the confidence, stamina and self-belief to complete their personal challenge and become active for life. The package of support includes:

- Three months fully supported training with professional swimming coaches
- Three months free membership to one of the participating leisure centres
- Free fast track physiotherapy support and strength and conditioning classes
- Free entry to the Great East Swim 2019
- Free wetsuit hire
- Pre-event open water training session/s
- All the encouragement and advice required from the programme team

Valued at over £200 per participant, the opportunities are being made available at a small one-off charge of £30 per person.

To apply for a place on the programme, people can visit www.suffolksport.com/greateastswim and complete the registration form. The programme coordinator will then be in touch directly to discuss the programme in more detail. Applications close on Friday 22 March 2019.
